-------------------------------------------------------------------
                                TASK 5 - Q1
-------------------------------------------------------------------
The given list of dictionaries representing a person with 'name' and 'age' keys: [{'name': 'Kumar', 'age': 5}, {'name': 'Yamini', 'age': 28}, {'name': 'Alex', 'age': 30}, {'name': 'Clara', 'age': 68}, {'name': 'Isabel', 'age': 35}, {'name': 'Henry', 'age': 18}, {'name': 'Karthik', 'age': 2}, {'name': 'Ivan', 'age': 17}, {'name': 'Ayan', 'age': 15}, {'name': 'Shobha', 'age': 16}, {'name': 'Kumari', 'age': 82}, {'name': 'Maria', 'age': 98}, {'name': 'Frederick', 'age': 21}, {'name': 'Mia', 'age': 24}, {'name': 'Amy', 'age': 42}, {'name': 'Naren', 'age': 53}, {'name': 'Max', 'age': 77}, {'name': 'Helen', 'age': 61}, {'name': 'Linda', 'age': 12}, {'name': 'Melvin', 'age': 11}, {'name': 'Derek', 'age': 2}, {'name': 'Raven', 'age': 1}]
Person names with age less than 18:
     Kumar
     Karthik
     Ivan
     Ayan
     Shobha
     Linda
     Melvin
     Derek
     Raven

Person names with age greater than or equal to 18:
     Yamini
     Alex
     Clara
     Isabel
     Henry
     Kumari
     Maria
     Frederick
     Mia
     Amy
     Naren
     Max
     Helen
------------------------------xxxxxxxxx------------------------------

-------------------------------------------------------------------
                                TASK 5 - Q2
-------------------------------------------------------------------
Given list:  [90, 11, 32, 1, 5, 23, -8]
Product of all numbers in the list:  -29145600
------------------------------xxxxxxxxx------------------------------

-------------------------------------------------------------------
                                TASK 5 - Q3
-------------------------------------------------------------------
Given list:  [102, 25, 8, 1, 17, 11, 2, 35, 16, 22, 121, 90, 15, 130, 3]
Even numbers in the given list:  [102, 8, 2, 16, 22, 90, 130]
List of squares of even numbers from given list:  [10404, 64, 4, 256, 484, 8100, 16900]
------------------------------xxxxxxxxx------------------------------

-------------------------------------------------------------------
                                TASK 5 - Q4
```

```
------------------------------------------------------------------
Enter a string: 13508790
Given string "13508790" is a number
-----------------------------xxxxxxxxxx-----------------------------

------------------------------------------------------------------
                                TASK 5 - Q5
------------------------------------------------------------------
Current date and time:  2026-04-16 17:13:54.594659
After extraction of year, month, day -  Year: 2026, Month: 4, Day: 16
-----------------------------xxxxxxxxxx-----------------------------

------------------------------------------------------------------
                                TASK 5 - Q6
------------------------------------------------------------------
Enter value for n: 10
The Fibonacci series up to 10 terms: [0, 1, 1, 2, 3, 5, 8, 13, 21, 34]
-----------------------------xxxxxxxxxx-----------------------------

Process finished with exit code 0
